HET PRAJAPATI

Software Engineer | Full-Stack & Data-Driven Application Development

Ahmedabad, Gujarat | +91-8733907300 | hetprajapati10@gmail.com | LinkedIn Profile | GitHub

PROFESSIONAL SUMMARY

Computer Engineering graduate (GTU, 2026) with hands-on experience across **full-stack development (React, Angular, Node.js, Django REST API)** and **data analytics/machine learning (Python, Streamlit, Scikit-learn)**. Built and shipped multiple end-to-end applications spanning frontend UI, backend APIs, and data-driven features, including a QR-based inventory system, an NLP-powered recommendation engine, and an LLM-assisted interview platform. Currently applying data science and GenAI concepts through a traineeship at Infolabz, following a completed IBM SkillsBuild Data Analytics Internship. Comfortable working across the stack — from building responsive UIs to designing REST APIs to analyzing data and prototyping with LLMs (LangChain, Hugging Face) — and looking to grow into a role that lets that range compound.

EDUCATION

B.E. in Computer Engineering *2022 – 2026*
SAL Institute of Technology and Engineering Research — Gujarat Technological University (GTU) (CGPA:7.99)

12th (Science) *2022*
Shree New Vidhya Vihar (Percentage: 67%)

10th *2020*
Shree New Vidhya Vihar (Percentage: 78%)

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, HTML5, CSS3
Frontend Development: React, Angular, Responsive Web Design
Backend & API Development: Node.js, Django REST Framework, RESTful API Design
Databases: MongoDB, MySQL
Data Science Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Plotly
AI / Generative AI / LLM: Prompt Engineering, Hugging Face Transformers, LangChain (Basics), Large Language Models (LLMs)
Data Visualization & BI: Tableau, Power BI, Streamlit
Version Control & Tools: Git, GitHub, Wireshark (networking basics)
Core Concepts: Machine Learning, Natural Language Processing, Data Analysis, Full-Stack Development
Learn Next: Cloud Platforms (AWS/Azure), Docker, CI/CD, Unit Testing

PROJECTS

Movie Recommendation System — *Python, NLP, Scikit-learn, Streamlit*

- Engineered a content-based recommendation engine applying NLP and cosine similarity across a large movie dataset.
- Deployed an interactive Streamlit interface delivering real-time personalized recommendations.

Uber Ride Data Dashboard — *Python, Streamlit, Plotly*

- Designed a multi-page dashboard surfacing ride trends, cancellation patterns, and vehicle performance metrics.
- Implemented dynamic KPI cards, filterable charts, and data caching to keep the app responsive.

Intelligent Interview Preparation — *React, Node.js, Python, NLP, LLM*

- Built a mock interview platform combining speech-to-text/text-to-speech with LLM-based question generation.
- Developed the React frontend and Node.js/Python backend powering response evaluation and readiness scoring.

Arduino-Based Obstacle Avoiding Robot — *Arduino, C++, Ultrasonic Sensors*

- Programmed an autonomous robot with ultrasonic sensors for real-time obstacle detection and dynamic rerouting.

QR-Based Stock & Inventory Management System — *Angular, Node.js, Django REST API, MongoDB, QR Code*

- Built a full-stack inventory system automating stock tracking and returns through QR code scanning.
- Developed the Angular frontend and Node.js/Django REST API backend, including authentication and real-time stock updates.

PROFESSIONAL EXPERIENCE

Data Science Trainee | *Infolabz* *Jan-2026 to May-2026*

- Apply data science and GenAI concepts through project-based learning, working hands-on with LLM tools and prompt engineering.
- Clean, preprocess, and analyze real-world datasets end-to-end, from raw data to exploratory data analysis (EDA).
- Build interactive dashboards and evaluate machine learning models using Python and Streamlit.

CERTIFICATIONS

Data Analytics Certification *2023*
CSRBOX in collaboration with IBM SkillsBuild

- Completed a Data Analytics program covering visualization and business intelligence concepts.
- Gained hands-on experience with Tableau, Power BI, and analytical reporting.

Deloitte Data Analytics Job Simulation *June 2026*
Forage

- Completed a virtual job simulation on real-world data analytics and business problem solving.
- Strengthened analytical thinking and data interpretation through hands-on case studies.
