

HET PRAJAPATI

Computer Engineering Student • Data Science Enthusiast

Ahmedabad, Gujarat | +91-8733907300 | hetprajapati10@gmail.com | LinkedIn Profile

PROFESSIONAL SUMMARY

Motivated Computer Engineering student at SAL Institute of Technology (GTU) with solid hands-on experience in data analytics, machine learning, and full-stack application development. Proficient in building end-to-end data pipelines, interactive dashboards, and recommendation systems using Python and Streamlit. Currently deepening expertise through a Data Science traineeship at Infolabz and a completed IBM SkillsBuild Data Analytics Internship. Actively exploring **Large Language Models (LLMs)**, **Generative AI**, and **prompt engineering** to build intelligent, AI-powered applications. Passionate about delivering data-driven solutions to real-world challenges.

TECHNICAL SKILLS

Programming Languages: Python, HTML, CSS, Javascript

Databases: MongoDB, MySQL

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Scikit-learn, Streamlit, gTTS, STT

AI / LLM: Generative AI, Large Language Models (LLMs), Prompt Engineering, Hugging Face Transformers, LangChain (Basics)

BI & Visualization Tools: Tableau, Power BI, Wireshark

Core Concepts: Machine Learning, Data Analysis, Natural Language Processing, Generative AI, Cloud Computing

PROFESSIONAL EXPERIENCE

Data Science Trainee | *Infolabz*

Jan-2026 to May-2026

- Apply data science and AI concepts through hands-on, project-based learning, including exploration of LLM-based tools and Generative AI applications.
- Perform end-to-end data processing: cleaning, preprocessing, and exploratory data analysis (EDA) on real-world datasets.
- Develop interactive analytical dashboards and data applications using Python and Streamlit.
- Build and evaluate machine learning models; leverage visualization tools to communicate insights effectively.

PROJECTS

Movie Recommendation System — *Python, NLP, Scikit-learn, Streamlit*

- Engineered a content-based recommendation engine using NLP techniques and cosine similarity on a large movie dataset.
- Executed full data preprocessing pipeline: feature engineering, text vectorization, and similarity scoring.
- Deployed an interactive Streamlit interface enabling real-time personalized movie recommendations.

Uber Ride Data Dashboard — *Python, Streamlit, Plotly*

- Built a multi-page interactive dashboard to analyze ride trends, cancellation patterns, and vehicle performance metrics.
- Implemented dynamic KPI cards, filterable charts, and responsive UI components for actionable decision-making.
- Optimized user experience through modular design and efficient data caching for fast load times.

Intelligent Interview Preparation — *Python, Streamlit, NLP, LLM, OpenCV*

- Developed an interactive mock interview platform using Python that simulates real interview scenarios with speech-to-text and text-to-speech integration. The system leverages LLM-based question generation and AI-driven response evaluation to provide a readiness score and personalized feedback.
- Implemented modules for question management, response analysis, and audio processing, along with a user-friendly interface.
- Implemented advanced search and filtering logic to improve service discoverability and match accuracy.

Arduino-Based Obstacle Avoiding Robot — *Arduino, C++, Ultrasonic Sensors*

- Designed and programmed an autonomous mobile robot leveraging ultrasonic sensors for real-time obstacle detection.
- Implemented reactive navigation algorithms enabling the robot to dynamically reroute around obstacles.

QR-Based Stock Inventory Management System — *Angular, Python, Django REST API, MongoDB, QR Code*

- Developed a full-stack inventory management system to automate stock tracking, product allocation, and return workflows using QR code technology.
- Built a responsive Angular frontend and Python-based REST APIs for managing products, transactions, stock movement, and inventory records.
- Implemented secure authentication, QR code generation/scanning, real-time stock updates, and transaction tracking to improve inventory visibility and traceability.
- Designed scalable backend services with search, filtering, and server-side pagination to efficiently handle large inventory datasets.
- Reduced manual inventory management efforts by digitizing stock issuance and return processes while improving operational accuracy and reporting.

EDUCATION

B.E. in Computer Engineering 2022 – 2026
SAL Institute of Technology and Engineering Research — Gujarat Technological University (GTU) (CGPA:7.99)

12th (Science) 2022
Shree New Vidhya Vihar (Percentage: 67%)

10th 2020
Shree New Vidhya Vihar (Percentage: 78%)

CERTIFICATIONS

Data Analytics Certification 2023 CSRBOX in collaboration with IBM SkillsBuild

- Successfully completed a Data Analytics certification program covering data analysis, visualization, and business intelligence concepts.
- Gained hands-on experience with Tableau, Power BI, data preprocessing, and analytical reporting.

KEY STRENGTHS

Quick & Self-Directed Learner • Analytical Problem-Solving Mindset • Effective Team Collaborator • Clear & Concise Communicator
